DNS Monitoring
From The User's Perspective
Do you know what they see?

Wes Hardaker
<wes.hardaker@parsons.com>
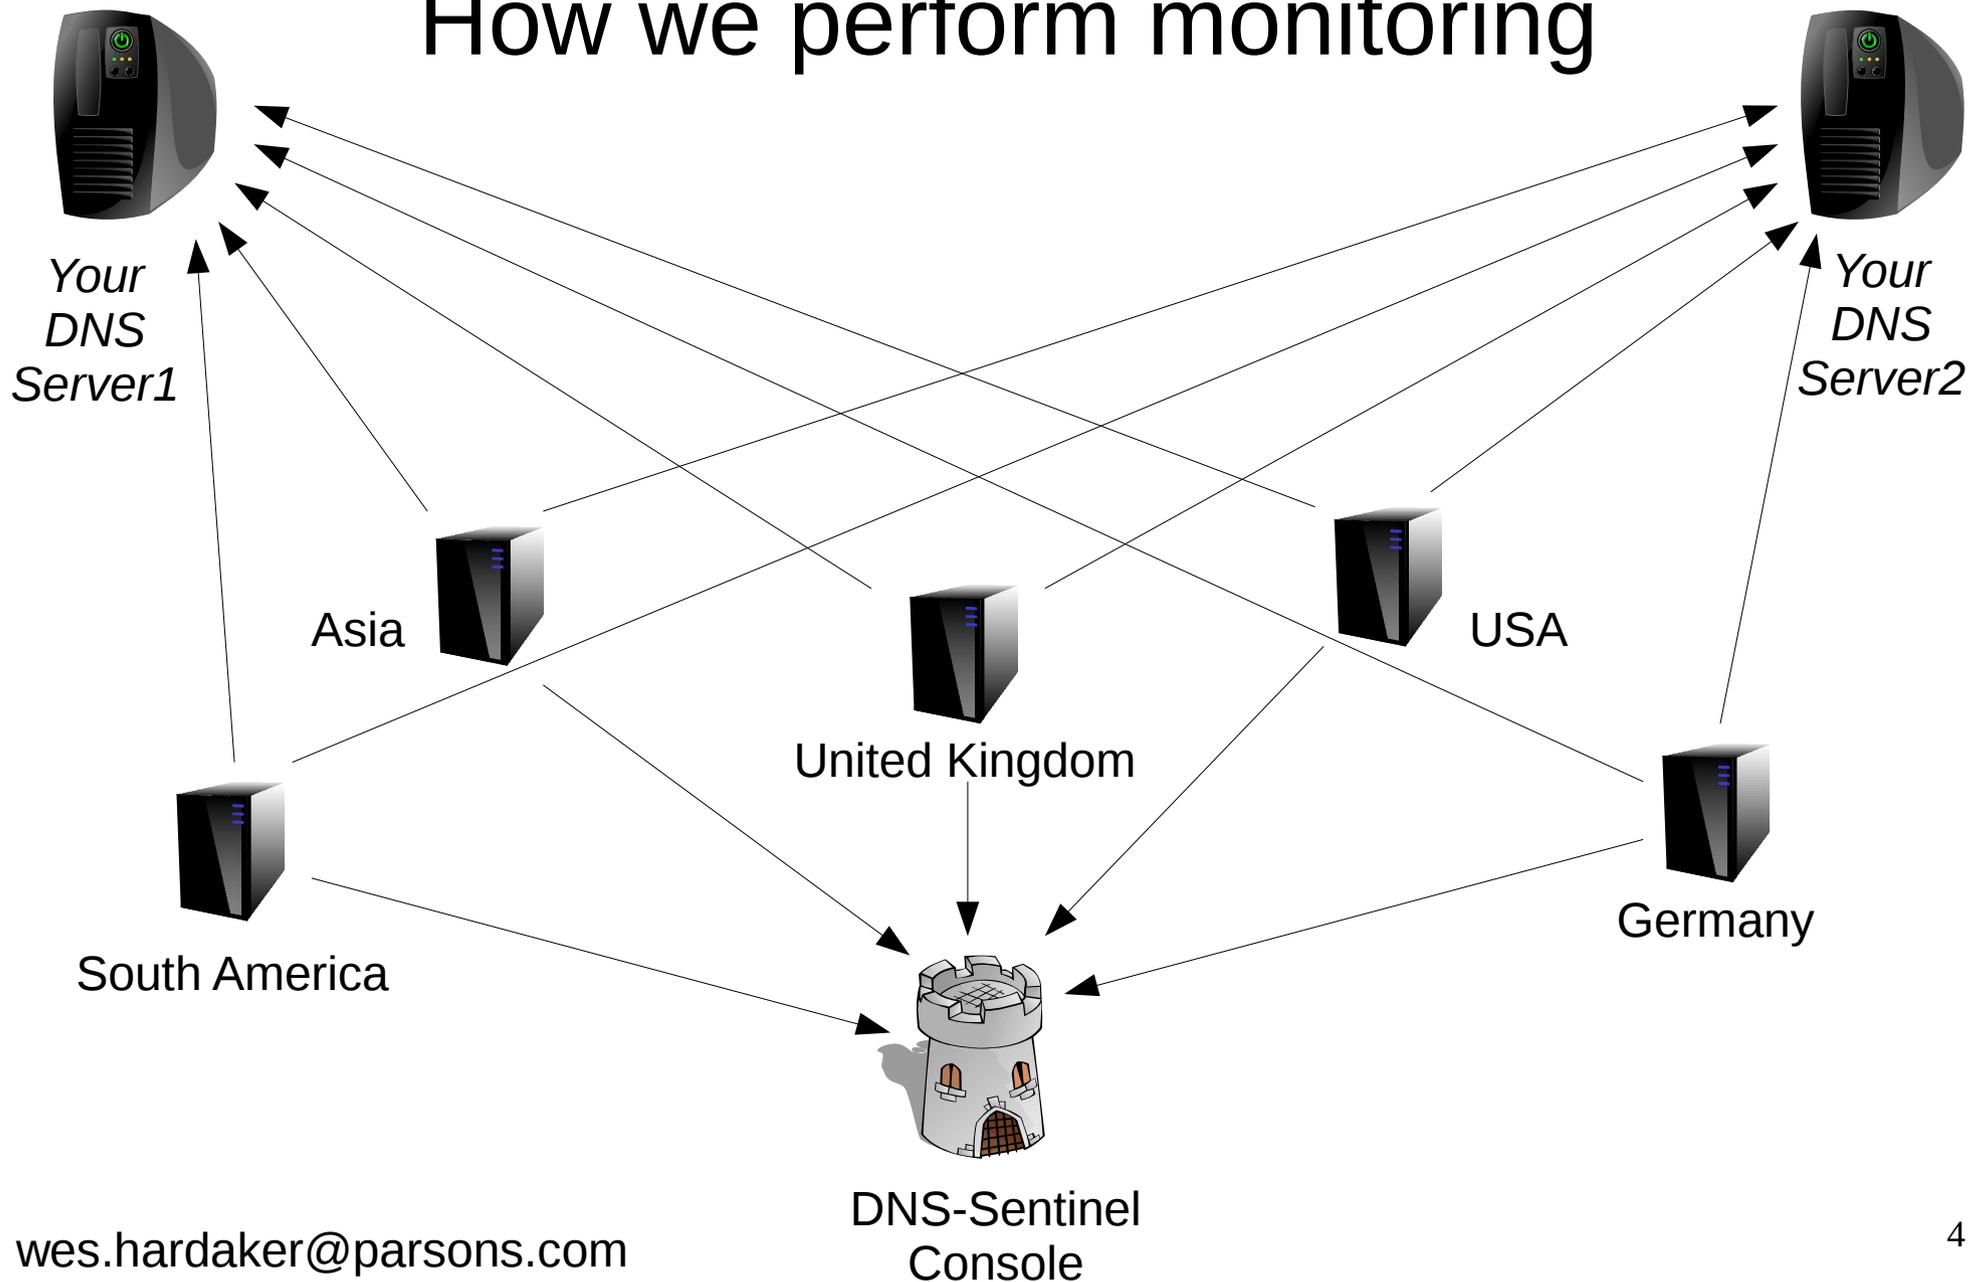

Zone Health Metrics

- Your customers need:
  - Your nameservers to be up
  - Your nameservers to serve the correct data
  - Your zone data to be consistent
- Do you know what your customers see?
  - You probably know what you see
  - But... they're somewhere else
  - Is your zone consistent **everywhere**?

DNS-Sentinel *(Beta)*

- A distributed DNS monitoring platform

- Detects and reports:
  - Changes in zone data
  - DNSSEC errors and warnings
  - DNS errors and consistency issues
  - Whois changes
  - Timing analysis
 - Many more planned and coming soon
